RAZER RAIJU ULTIMATE FIRMWARE
UPDATE

VERSION 1.01
RAZER RAIJU ULTIMATE FIRMWARE UPDATE VERSION 1.01

This document is a step by step process on how to update the Razer Raiju Ultimate to firmware version 1.01.

Please note you will need a Windows PC to install the update your Razer Raiju Ultimate Edition controller

**Firmware Official Release Notes:**

- The “Trigger Stop” function not working properly on PS4 with wired mode.
- Small drifting of the joystick on some units.
INSTALLATION PROCESS

1. If you have not already done so, download the firmware update to your PC at the link below:
   - http://dl.razerzone.com/drivers//Raiju Ultimate/win//RaijuUltimate_FirmwareUpdater_v1.01.00_r1.exe

2. Close Razer Synapse and other applications before launching the firmware update.
3. Connect the Razer Raiju Ultimate to a USB port on your PC
4. Launch the downloaded file and left click the "Update" button

5. Wait for the firmware updater to complete the update process
6. You should see a confirmation message once the firmware update has been successfully applied. “Close” to exit the updater. Your firmware has now been updated.

7. End
